PROJECTS

Instagram Clone— *Web Project*

Instagram according to me is a perfect example of a CRUD application handling not just String Data but also image processing. So to work on my skills I planned to build a minimal clone of the same.

Vue.js | Firebase | Vuex

Weather Application— *Web Project*

Used HTML, CSS and Js to make a simple weather application using OpenWeatherMap API and browser geolocation API.

HTML | CSS | Js

Covid Trivia Quiz— *CPP*

People in India weren't really aware about all the symptoms and cure for covid-19, so I decided to make a small quiz to spread awareness about the same.
